## Introduction

As iPhone and iPad applications – or apps – gain popularity simply through the explosive sales that accompanying the brand's customer loyalty – and the need for an upgraded version of each device upon its release – Apple now touts over one million apps in its App Store.

That number, clearly, leaves a lot to the imagination. Is it possible to examine each app within your Apple device? Probably not. However, that does not mean that there are not a few dozen that stand out among the massive numbers. There are dozens of great free apps, and some extraordinary paid apps, as well as games that can be downloaded to help simply your life, while entertaining you on the go.

We at [www.techmediasource.com](http://www.techmediasource.com) have put together this handy guide of 50 great iOS apps. This will help take some of the guesswork out of what apps will be useful and good for your Apple devices.

## Great iOS Games: Free & Paid

No device is complete without gaming capabilities, because let's face it: You have some downtime where checking email is the furthest thing from your mind. Gaming is a great way to take your mind off the stress of the day, or simply challenge yourself to a friendly game with friends to compete for bragging rights at your next dinner party. Here are a few free and a few paid versions that will keep you entertained.

### Flappy Space Bird Invasion - Flying Alien UFO Game

[Flappy Space Bird Invasion](#) is a great game that is somewhat like the mega hit Flappy Bird, which is no longer available in the app store. In this free game, you will help Zippy the Alien Flappy Space Bird UFO through the intergalactic planet Flytron to collect moons and rack up a super high score. Can you beat your previous score? Can you beat your friends' high scores? Download this game and find out now! It is sure to be addicting.

### Space Slots - Free Casino Gambling Game

[Space Slots](#) is a Vegas-style slots game, which is a great way to get your slots on while on the go. This game features pleasing space themed slots action. You are provided 200 credits to start. See how many credits you can win with this Vegas-style casino slots game.

### Real Racing 2 HD

[Real Racing 2](#) turns your iOS device into a virtual steering wheel, allowing you race against friends or complete strangers, choosing from cars that you can afford (with your winnings) an extra boosters that allow you to have an advantage over the rest of the pack. The device can be tilted for steering capability, acceleration and braking power. The cost is \$6.99, which is completely worth the graphics and playability alone.

### Diversion

[Diversion](#) allows you to progress through over 700 levels by jumping, swimming, running and climbing as you unlock new worlds by collecting gems and clearing the obstacles of ledges, spikes, bombs and drones that will take your virtual life away in an instant. The highly addictive, and fun for all ages (there's a kids version as well!) app is available for \$1.99.

### Vocabulary.com

If you would like to expand your vocabulary, without having to sift through the dictionary every day, forcing yourself to acquire a new word for use, the [Vocabulary.com](#) app is the perfect way to get started. This app operates more like a game – fun and addictive game. Instead of forcing yourself to learn new words, you can challenge yourself to enhance your vocabulary by using its intuitive design for the low cost of \$2.99.

## **Double Across**

If you love Words with Friends, you will absolutely love [Double Across](#), a popular multiplayer crossword game that allows up to six players or 15 simultaneous games to be active at any one time with people you know, or complete strangers around the world! Challenge friends by keeping track of your wins and scores on the leaderboard, or enjoy game center achievements on your own for \$4.99.

## **Super QuickHook**

[Super QuickHook](#) is an exciting adventure game that allows your character to use a grappling hook to swing from place to place in dangerous conditions and mountainous and cavern filled landscapes. The game features 24 levels with hidden areas and treasures, which simply means that even if you beat all the levels once, you can play again and discover new items. Cost: \$2.99

## **Need for Speed Shift**

The [Need for Speed Shift](#) racing game is so popular that there is even a movie coming out based on its exceptionally exciting playability. You can turn your car of choice by simply shifting your tablet while enjoying 28 different vehicles that you can race against friends through shared WIFI hotspot or by connecting your devices through Bluetooth connectivity. Cost: \$9.99

## **King Games: Candy Crush Saga, Pet Rescue Saga & Farm Heroes Saga**

King Games has provided the world with three amazingly addictive games: [Candy Crush Saga](#), [Pet Rescue Saga](#), and [Farm Heroes Saga](#). Each of the games can be downloaded and played for free, with the overall goal of matching like candies, blocks or farming components, respectively, to move onto more difficult levels. Each game provides the player with five lives to accomplish as much as possible, and move onto new levels. A new life is administered every thirty minutes, so if you burn through them quickly you will have to wait to play on – or you can purchase more, of course.

## **Scrabble (Free and Paid)**

An old favorite, [Scrabble](#), is available for iOS devices and allows players to pit their word building skills against each other for free with the advertising supported version. The board will provide real time scoring, as it tallies your points as you build words, so you know exactly which options will give you the best score. There is a paid version that will remove all ads, and allow you to play on without interruption for [\\$7.99](#).

## Great Free iOS Apps

Free apps are the electronic equivalent of free candy to kids. You can download as many as you would like, and just as easily remove them if they do not fit your personality, workload or entertainment values. Simply download from the App Store, give them a spin and see what sticks, right? The following this is a one of can't miss opportunities in the free app world.

### SwiftKey

SwiftKey Keyboard replaces your device's on-screen keyboard, within the application, to help you type in an easier, faster and less frustrating way. This is the perfect app for taking notes on your iPhone or iPad, as the features within the technology help you type faster, with better prediction quality, while it learns how you write to keep a consistent flow. Next time you are in a meeting, and all you have is your iPhone, never fear – [SwiftKey is here](#).

### Evernote Peek

[Evernote Peek](#) is a perfect way to study for an exam, or simply brush up on your brain training with an exceptional learning app. Simply put, if you have a cover over your iPad, you can lift the bottom part to reveal a question, and then lift a little higher to reveal the answer. If you are studying for an exam, you can input your personal notes and information from Evernote directly into the app, and "Peek" at the questions and answers as you see fit. What's more is that if you do not have an iPad cover, you can add a virtual one using this app.

### Octonius

[Octonius](#) lets you search all your content on Evernote, Dropbox and Google Drive, while organizing it, tracking it and sharing it effortlessly. Octonius lets you search all your content on each platform, manipulate it and share it as you see fit all within a single app.

### Bloop It

Much like Vine has done, [Bloop It](#) is aiming to shorten videos into twenty second or less increments. Even better is that it allows you to cut YouTube videos down and share them across social networks easily. This means you can take the best twenty seconds of your three minute YouTube video and share it with your networks, ensuring amplified views thanks to the video's brevity.

### SocialRadar

[SocialRadar](#) combines your location data with your social media networks, including Facebook, Twitter, LinkedIn, Foursquare and a host of others, providing a snapshot of your connections and their locations. This allows you to head in one direction or the other to either interact with – or avoid – those who fall into your social networks.

## **Google Play Movies & TV**

As of January 2014, Google has opened up its [Google Play Movies & TV](#) app to the iOS community, which allows users to stream existing content. However, you will not be able to make purchases from your iOS device. The App Store will allow no such synergy. But it is nice to have access to items that you did not purchase through the Apple name, and take them on the road with you.

## **Momondo Places**

[Momondo Places](#) is a travel tool that matches your travel style, giving you access to free city guides based on your personality, using hand-picked tips. What's more is that you can search the city you are in for restaurants, entertainment and hot spots based on your mood! Feeling like a quiet night with a pint in the corner of a pub? Tell the app your thoughts, and receive a list of recommendations. Feel like dancing the night away? Just say so to be pointed in the right direction. You can even view the guides offline, and enjoy GPS directions to help get you there.

## **QuizUp**

[QuizUp](#) allows you challenge friends – and complete strangers – to a game of general knowledge. There are hundreds of topics and nearly one quarter of a million questions that can keep a group of interested parties pitted against each other for months!

## **Facebook**

[Facebook](#) itself is a social media platform that allows you to create a group of "friends" with whom you share information, pictures, videos and games. The creators of Facebook have finally stepped up their game and maximized their app's interface to work optimally with iOS devices. The app lets you browse photos in full screen at higher resolution, and it integrates with Facebook apps and games that have an iOS counterpart (FarmVille, Words With Friends, Candy Crush Saga and hundreds of other options).

## **Find My iPhone**

Apple's [Find My iPhone](#) app is designed for locating any lost iOS device. It now lets you locate iPhones, iPads, and iPods from your home computer, or another device where you can access the website. You can shut down your devices completely from a remote location if you believe it has fallen into the wrong hands and your personal information is in jeopardy, or simply pick up the signal to realize you left the device in your trunk, at work or at your favorite restaurant.

## **Google Maps**

Years ago, Apple devices came standard with [Google Maps](#) and the world was happy, directionally functional place. Then Apple switched to their mapping system, and the world was lost without their Google infrastructure. Now Google Maps are welcome back to your iOS device, but will never be the default option again, so you must download the app accordingly – and you should.

## **Dropbox**

[Dropbox](#) is mobile cloud storage that allows more than the iCloud capability of you accessing your information from any device. Dropbox allows others to place items into your "Dropbox" so that you can access them from anywhere, whether you are using your iPhone, iPad or a Kindle Fire. Access documents, photos, and videos from a heterogeneous mix of mobile devices and allow others to share their items along the way. It is perfect for business use, and can give you the freedom to keep on the move, while others finish their reports for your approval later.

## **Duolingo**

[Duolingo](#) provides an exceptional platform that delivers an innovation approach to learning a new language, including French, Spanish, Portuguese, German, Italian or even English. The app uses gaming techniques that allow you to complete levels and compete with friends while you learn. The lessons are easy to follow and even provide the opportunity to translate text in the language studied.

## **Burner**

Welcome to the world of anonymity called [Burner](#). The app provides users with a temporary – and disposable – phone number, so you can make calls under the cloak of confidentiality. A burner number allows you to make outgoing calls, as well as accept incoming calls, texts and voicemails with a free number for seven days. This is the perfect tool to test the dating waters, looking into job searches or answering Craigslist ads.

## **Uber**

The [Uber](#) App allows you to hire a private driver in over 50 cities and 20 countries around the world. Simply request a ride, compare rates for the different types of vehicles offered and get a fare quote in seconds. Payments can be made using PayPal or credit card, so you never have to pay the driver in cash. This app keeps you from standing in cab queues or taking a ride that develops into a small investment simply because you never thought to ask how much from a downtown city to its airport.

## **Shazam**

If you have ever been riding along in your car, sitting in a restaurant or even shopping in a retail store and would like to know the name of the tune playing, simply tap on your [Shazam](#) app and allow it to analyze the song's digital fingerprint to reveal the name of the song, the artist, the album title and even the lyrics in a matter of seconds.

## **eBay**

The trusted way to buy and sell items in a familiar auction format comes to life on your iPhone or iPad with the [eBay](#) app. You take a picture of the item you want to sell directly from your device, upload it through the app and let the bidding begin with just a few keystrokes. You can also bid on items, track their current price in real time and solidify your purchase and make a payment all from the app.

## **Skype**

People who use iOS devices, including the iPhone, iPod and iPad, usually rely on Apple's FaceTime to keep in touch with those they love. [Skype](#), however, is incredibly handy because it lets you talk face to face – for business or pleasure – with those who do NOT have an Apple device. Believe it or not, these people exist and if you want to chat with them you are going to need an app that will allow you to do so effectively. Skype is that app.

## **Photo Editor**

The built in iOS Camera app has limited editing functionality built in, so adding an app that will help you edit your beloved images is a must for any picture posting perfection. [Photo Editor](#) provides filters, one touch enhancements (like red eye removal) and tools for retouching and drawing. That means you can remove blemishes, convert images to black and white or even paint color back into the image. You can also add text, should the picture not speak for itself.

## **Fotopedia**

[Fotopedia](#) allows you to travel the world by following other peoples stories that culminate from text and images of differing cultures, locations, wildlife and much more. It resembles a magazine format combined with a scrapbook, photo journal and travel guide all in one app. You, too, can create your own stories for others to follow, broadening someone else's reach in the world.

## **TED**

TED: Technology, Entertainment, Design. [TED](#) is an app that provides talks from clever, intelligent and exceptional industry leaders around the world. You can watch TED talks live or download and view them offline. You can watch riveting content that enlightens you on technology, philanthropy and even inspirational content that is provided by the definitive guidelines you provide. The app will deliver selections that fit your needs and interests, while allowing you to broaden your knowledge on innumerable levels.

## **BBC iPlayer**

[BBC](#) provides an unbiased and professional look at news stories and content from around the world, and allows you to play that information in a video catch-up version that other news providers cannot come close to. You can download the content for later, or stream it over a wireless network. You can also watch it on your television screen by airing it over Apple's AirPlay option directly from your iOS device.

## **Twitter**

[Twitter](#) is a social media platform that allows you to express your opinions to the world – or at least your connections that are called "followers" – in 140 characters or less. You can upload pictures, videos and even text that delivers a succinct

summation of what is going on in your world. Followers can favorite your comments, respond to them or retweet them as they see fit to spread the word.

### **Remote**

With the [Remote](#) App you can control your Apple TV using your iOS device. This is a great tool for those who want to search – as your keyboard definitely comes into play – and you do not have to type onscreen using the left, right, select, left, right, select functionality that the limited (and tiny) Apple TV remote provides. The app can also control local iTunes libraries and send the audio onto the screen via AirPlay.

### **Skyview**

If you have ever looked up to the sky and thought, "What is that? A planet? A star? The Space Station?" [SkyView](#) is the perfect app for you. Simply download it, engage it and point your device up to the heavens and receiving all of the information you could ever want about the stars, planets and space objects in real time. You can also jump forward and check the sky on upcoming dates and times, if you were inclined.

## Great Paid iOS Apps

Sometimes you cannot always get what you want out of a free app, and expect a little more from the paid version. Even if you are simply trying to get rid of overbearing advertisements and figure it is worth a couple bucks to use a clean version of an app, paying for some of the great ones is never a loss.

### Horizon

The [Horizon](#) App allows you to shoot horizontal videos regardless of how you hold your device. That's right! No more waffling between shootings of landscape and horizontal, simply because you tipped your phone in the wrong direction while recording. It shoots the best format first, and maintains it at all times, for a mere \$1.99.

### The Wonders of Life

Optimized for both iPhones and iPads, [The Wonders of Life](#) series brings you over 30 3D creatures and habitats, hours of HD live video streaming, over 1000 images of nature and all of her beauty, in tune with an awesome soundtrack, all for \$5.99.

### OmniFocus

[OmniFocus](#) is an advanced task management app that uses location reminders, which can be handy for when you are in the exact area of a certain task on your list. For instance, if you have "pick up the dry cleaning" on your to do list, OmniFocus will remind you that you are going to drive right past your cleaners' location so that you can duck in quickly and complete a task without forgetting. It also offers maps and forecasts, as well as an enhanced task editor to help keep your life on track. Price: \$40

### Jump Desktop

[Jump Desktop](#) is an incredibly handy app for remotely controlling a Mac or Windows PC from an iPad or iPhone. The technology allows users to connect to an existing RDP (remote desktop protocol) or VNC (virtual network computing) server effortlessly. The Jump Desktop is the perfect way to control a work computer or off-location laptop from your mobile device for \$14.99.

### GoodReader

[GoodReader](#) allows you to open documents, images and even books, movies and maps in a PDF format, so your device can read anything sent its way effortlessly, all for \$4.99.

### Instapaper

[Instapaper](#) provides its app users with the opportunity to save articles for future reading, without having to look them up again – or remembering that you wanted to follow up on the content. Simply drag the Instapaper bookmarklet to your toolbar, and it will save all of your content until you are ready to read it.

## **LogMeIn**

Another remote control log-in app that is incredibly helpful and easy to set up, called [LogMeIn](#), lets you use your [iPad](#) or iPhone to remotely control a Mac or Windows PC via WiFi or 3G cellular. You can purchase three months of the service for \$5.99, or a complete year for \$9.99. The Pro edition lets you transfer and save files among devices, access files stored on popular cloud services, stream HD video and sound, and print remotely to an AirPrint-compatible printer, which is a key feature if you are often on the road.

## **Sleep Cycle Alarm Clock**

This innovative [Sleep Cycle Alarm Clock](#) app assessing your sleeping condition by analyzing your resting hours, and wakes you up during your lightest slumber to provide a natural awakening, instead of a jarring alert. This means you can wake up without feeling annoyed by an alarm interrupting your dreams. It is available for \$.99 and completely worth it if you dislike the sound of your alarm.

## **Notability**

[Notability](#) is more than a note taking app. It allows you to sketch ideas, annotate documents, sign contracts, complete worksheets, keep a journal, jot travel notes, teach a class, and even make a presentation. What's more is that with its iCloud support, your creations, changes, documents and content stay up to date across all of your iOS devices! You can import forms, contracts, worksheets, documents, presentations, and even books, while using the same note taking tools that are readily available to market up the items as you see fit – including PDF files. Even when you receive documents in Word or PowerPoint, Notability will import them flawlessly so you can read each document without any trouble. All of this is available for \$2.99.

## **iMovie**

Creating movies from the footage you record on your iPhone or iPad has never been easier, and we're not talking just replaying video footage. With [iMovie](#) you can take your recorded footage, choose themes and clips you want to use to create a trailer – even adding a soundtrack, if you choose while creating special effects. The app allows you to tap and swipe to edit video, so the platform is exceptionally easy to use. You can fast-forward, replay in slow motion or even tap your favorite moments to refer to them quickly. Once you have created an iMovie of your own, you can play it for your audience in its entirety, all for the app price of \$4.99.

## **Tweetbot**

[Tweetbot](#) adds a completely new dimension to the Twitter universe that allows you to mute certain comments based on their hashtags, so you do not have to endure another Justin Bieber argument again. You can create drafts to Tweet later, customize your tab bar, enjoy push and inline notifications and create lists that allow you to love Twitter all over again. Tweetbot is available on iPhone for \$1.99 and iPad for \$2.99

## **1Password**

[1Password](#) works exactly as the name suggests: 1Password to reach all of your pertinent information like bank accounts, credit card statements and secure login accounts across the web. The security protection is second to none, and you can reach all of your sensitive online profiles without compromising the integrity of your favorite password. Cost: \$9.99.

## **Reeder 2**

RSS Feeds are incredibly popular, and [Reeder 2](#) allows you to view all of your favorites from one, easy to read platform. Reeder 2 syncs with Feedly, Feedbin, Feed Wrangler, Readability and Fever so all of your news is readily available in a single place. You can also add feeds manually, and share or export content to compatible sharing services for \$4.99.

## **Moves**

Sometime it may seem as if you walked 87 miles in a single day, while you run errands around the city. [Moves](#) allows you to verify your activity by tracking walking, running and cycling activity passively. The app will track your movements, exercises and calories burned as well as map out your route, so you can literally reflect on how you "ran around in circles" all day. The app is only \$2.99 and provides an array of information regarding your movement, so you can feel accomplished at the end of each day.

## **FlightTrack 5**

[FlightTrack 5](#) is a necessity for anyone who travels regular, or who hosts guests that need a ride from the airport. With all of the modern technology available, it is still impossible for someone to tell you via in-air flight that they are delayed. With FlightTrack 5 you receive real time departure information, delays and even gate numbers for each flight you plug in. You can also receive alerts or push notifications for flights that are plugged into the app. You can even add upcoming flights to your calendar and allow the app to keep you posted on any delays for only \$4.99.

## **TurboScan**

[TurboScan](#) turns your iPhone into a multipage scanner for documents, receipts, notes, whiteboards, and other text, allowing you to keep the documentation electronically – and relieve the worry of losing a record. Quickly scan your documents and store or email them as multipage PDF or JPEG files to others for real time use, or to include in a presentation later. Cost: \$2.99

## **Checkmark 2**

[Checkmark 2](#) is the latest iteration of the Checkmark To Do List app that allowed users to keep their scheduled tasks, well – on schedule. The latest version allows endless lists to be categorized for easy addition, deletions and completion. There are flexible reoccurring reminders, geographical reminders, one tap rescheduling and

the power to say things like, "Mail the cable bill before I leave for vacation on Thursday" and receive a reminder later in the week to do exactly that. Cost: \$2.99.

### **Free Music Download Pro: Downloader and Player**

Although the [Free Music Download Pro](#) app itself costs \$2.99, the downloading it allows of music, videos, lyrics, ring tones and audio books is free and legal. The app operates as a file and download manager, media player and web browser at once, and gives you exceptional access to all of your favorite tunes.

### **5K Runner: 0 to 5K Run Training Pro**

For those who do not run, starting a running regiment can be intimidating, to say the least. With [5K Runner: 0 to 5K Run Training Pro](#) you will get the training you need to start out slow, literally going from the couch to a 5K run participant in no time. With over 2.5 million people attesting to its ability to get new runners in shape, the app has been praised by media outlets and individuals who have trusted the app to help them become more active. For \$2.99 it is the best coach you can have available at your fingertips.

### **Scan: QR Code and Barcode Reader**

Whether you are scanning QR Codes to gain access to a promotion or website, or scanning barcodes, UPC symbols or ISBN numbers to gain access to more information on a product, book or service, the [Scan: QR Code and Barcode Reader](#) app allows you to easily scan everything with a code so that you can obtain all of the information you need to make an informed decision about your purchase, use or even ingestion of food when the label is not as clear as you would like. Simply use the camera on your iOS device and receive real time information on everything that scans for \$1.99.

### **WhatsApp**

[WhatsApp Messenger](#) allows you to message others without cutting into your messaging allocation count – should you have such a thing. In a world of unlimited texting, this app does more than give you free access to texting. WhatsApp will notify you when a text has been received by the recipient, and also allows you to upload photos, videos, and audio messages into conversations to make the conversation more exciting and interactive. What's more is that you can let people in your contacts list in the WhatsApp Messenger know that your that something is up with you, and possibly your phone, so that they do not think you are completely avoiding the messages on purpose. Use away messages like "Battery is dying" or "In a meeting" or "At the movies" so the world knows you are not being rude, but actually unreachable. This app is available for \$.99

### **Idea Store**

We all have ideas. Some good, some great and some terrible, which is why you need a place to store them – besides a forgetful mind. [Idea Store](#) allows you to store entries in categories or by date, while building on them as you see fit. You can add, delete, build and even flag ideas that you want to come back to in a specific place

and platform, instead of your notes section. This is perfect for those who are writing a book or learning a new skill that requires idea acknowledgement in a single location. The Idea Store is available for \$2.99 and provides a productive outlet for all of the burgeoning idealists in the world.

### **Zen Brush**

Sometimes it is possible to miss the feeling of using an ink brush, that allows you to paint or write using your phone or tablet; an incredibly creative outlet. [Zen Brush](#) delivers fluent strokes with exceptional texture, with access to background templates and themes to unleash your inner artist when you have a few free second to dabble in an old favorite. Cost: \$2.99.

## Conclusion

Using your iPhone or iPad for entertainment purposes is great. You can play games, keep up with your social networks and even check your personal and work emails all from one platform! The good news is that you can also work from your device, accessing offsite computers, manipulating documents and enjoying the freedom to move around, travel and enjoy personal time knowing that you can be at attention in a moment's notice. Having access to everything you could ever want, whether it is information or online products allows the world to communicate clearly, effectively and a broad sense of purchasing and scheduling power from their handheld device. Technology is a great thing, especially when your iOS devices are all "talking" to each other and keeping your information up to date on each platform.

The flipside to the technological synergy is that you may have an overwhelming feeling of not being able to get away – because everyone knows you CAN work from your iPad! Be sure to make time for yourself, away from your devices, so your friends and family know that you can communicate beyond your onscreen keyboard. It is important to use electronic devices optimally, so you are getting the best bang for your buck. However, it is important to remember all the things you loved before the device made its way into your life.

Keep up with all the latest iOS and Apple news at [www.techmediasource.com](http://www.techmediasource.com). We hope you have enjoyed our free guide to the best free and paid iOS apps.
